Suction Cups Mini #20967

Tri-Beads Rainbow #16932

Small Paper Plate • Markers  
• Scissors • Hole Punch

available at **Walmart**  
Save money. Live better.

### Instructions

**1** Gather your supplies.

**5** After you have colored the plate, punch 4 holes in the inside rim of the plate. Punch the holes so that they will be across from each other, top, bottom, left side and right side.

**2** Cut the center out of a plate if you have a clean paper plate to recycle use it! Tip- it helps to fold the plate in half and then cut the middle section.

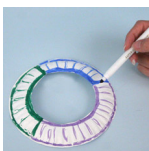

**6** Cut a Glitter Stick in half. Attach one end of the Glitter Stick through one hole in the plate.

**3** Color the plate with your markers.

**7** String some Tri-Beads onto the Glitter Stick. You can also use Pony Beads or other plastic beads for this project.

**4** Flip the plate over and color the other side of the plate. The plate will be hung in a window, so you will be able to see both sides.

**8** Once you have about 4 or 5 beads on the stick, attach the open end of the Glitter Stick to the opposite hole on the plate.

## Beaded Sun Catcher

9

Attach the other half of the Glitter Stick to another hole on the plate. Repeat Steps 6 and 7.

10

Decide which part of your sun catcher will be the top. Punch a hole and attach a Glitter Stick for hanging. Loop onto a Suction Cup and attach to your window to display!
